## Digital Construction for Indian AECO Sector

Dr. Amarnath CB

Head - BIM Strategy, Larsen & Toubro |  
President, India BIM Association

In India, AECO - Architecture, Engineering, Construction and Operation sector has the second highest inflow of foreign direct investment. There have been several infrastructure and smart cities projects taken up recently with digitalization as a key focus area. BIM - Building Information Modeling is one of the most notable ones, with its ability to reduce project time delays, cost overruns, and litigations. The proposed talk strives to deliver integrated BIM in AECO sector projects to build a positive business environment for the efficient deployment of BIM and digital transformation in India.
