Building Services - Changes and Excellence

Mr. Sandeep Goel

Founder & Director |
Proion Consultants Private Limited

Building services are the systems installed in buildings to create an interior environment which is comfortable, functional, efficient and safe. Building services include more inclusions and challenges with equal emphasis on the Green Building Rating system. The COVID19 pandemic has brought in the changes for future construction while planning building services and achieving excellence. The proposed talk strives to showcase the state of the art in building services, their challenges and strategies to achieve excellence with focus on Energy Performance Index (EPI).
